FIG. 6 is a block diagram of a system for collecting and determining a position target. The system includes a computer 5, an Internet 7, a web server 62, a position targeter 64, and a collection and determination system 50. The computer 5 is connected to the Internet 7. The web server 62 and position targeter 64 are connected to the Internet 7. The position targeter 64 is connected to the collection and determination system 50 via a dashed line.

FIG. 8 is a block diagram of a system for collecting and determining geographic data. The system includes a computer 5, an Internet 7, a web server 62, a position targeter 64', and a local geographic database 66. The computer 5 is connected to the Internet 7. The web server 62 and position targeter 64' are connected to the Internet 7. The position targeter 64' is also connected to the local geographic database 66. The system is used for collecting and determining geographic data.
